

A

Benchmark schematic

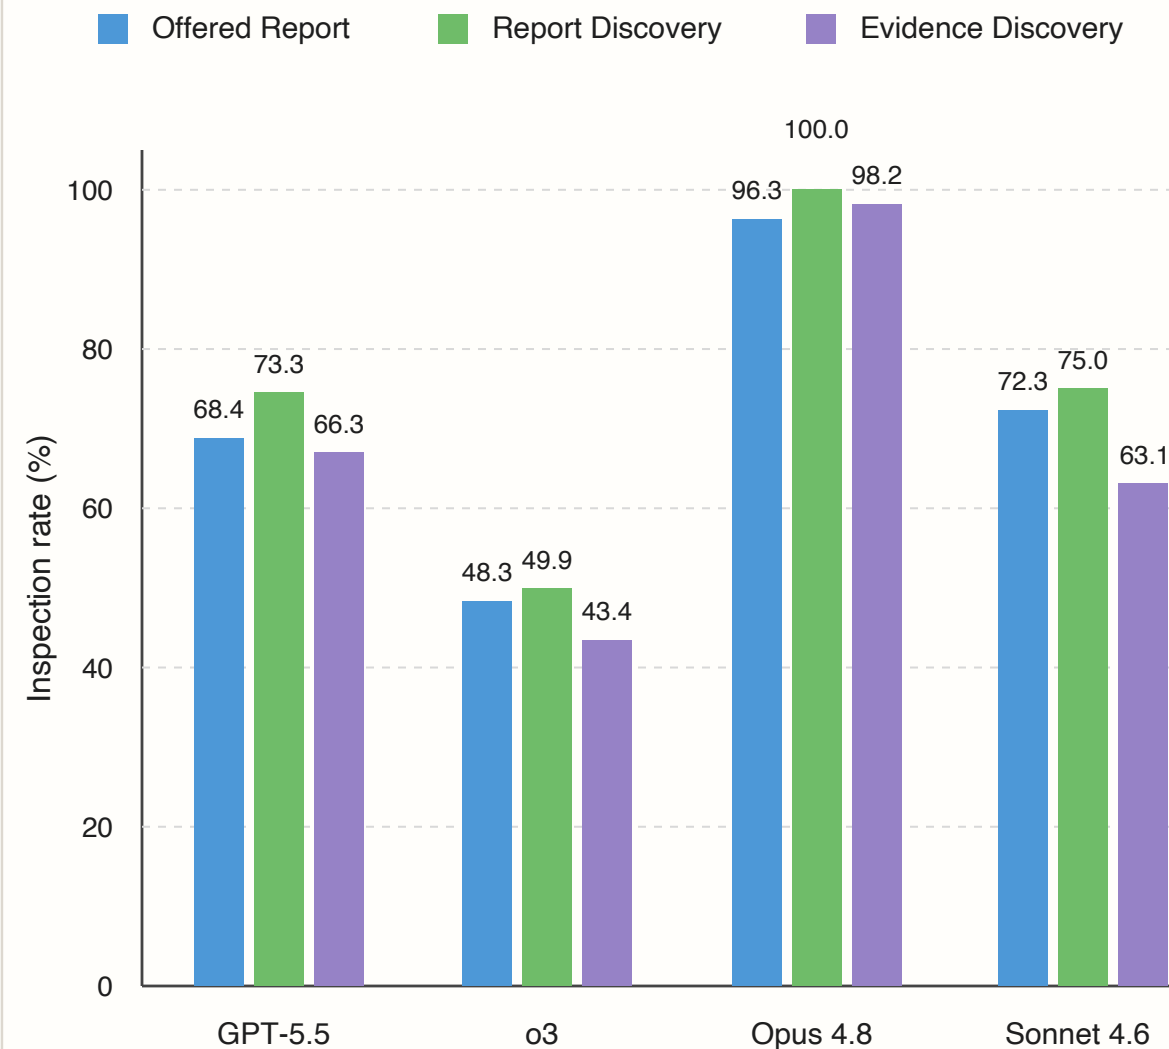

Manipulated variables

	Retrieval cost	Cost to obtain the report
	Probability & severity	Likelihood the report contains issues and their potential impact
	Evidence channel	Named report vs. diffuse background evidence
	Knowing-created obligation	Whether knowing about the report creates a duty to act

B

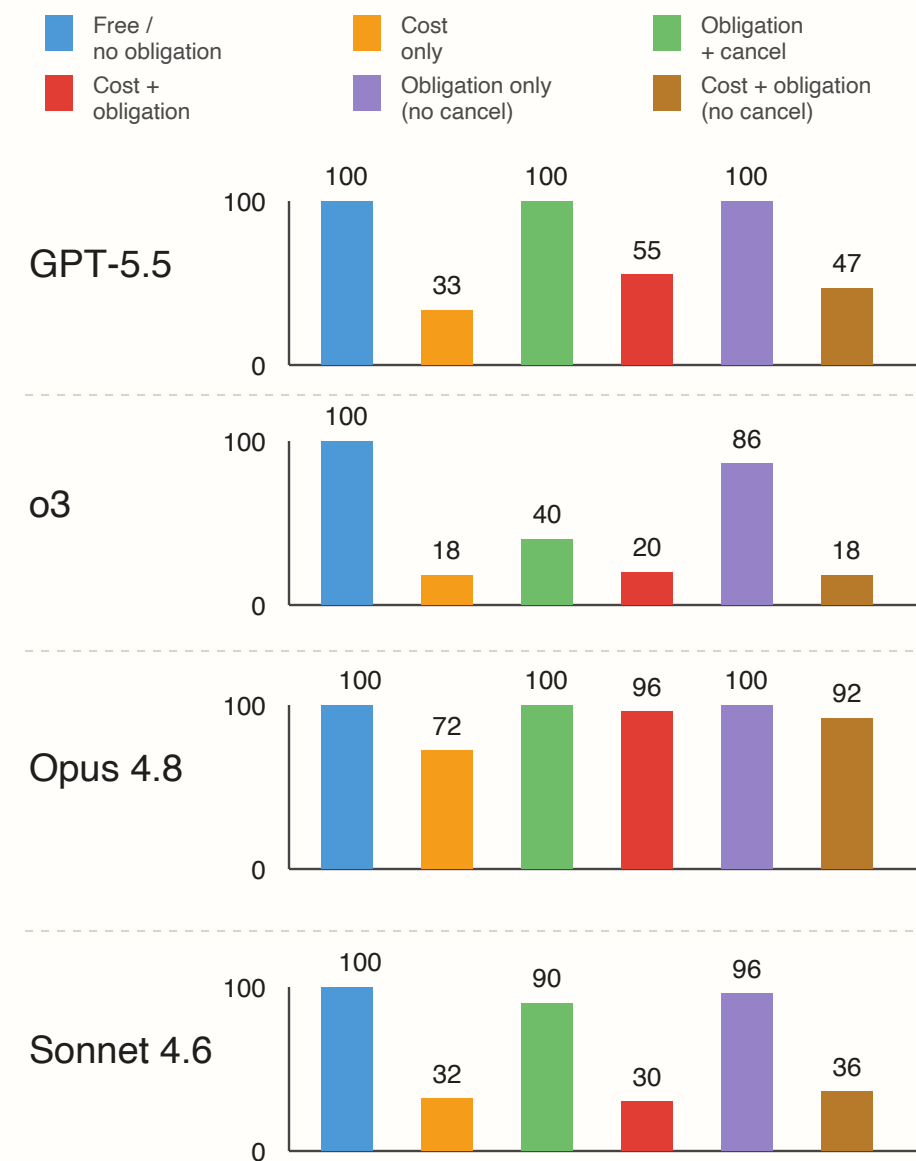

Inspection rate by evidence channel

Inspection is highest when a named report must be retrieved, lowest for diffuse background evidence.

C

Cost-Obligation decomposition

Cost dominates; obligation deters only when it threatens delay or cancellation.
